

Ameerul Arif, Mohd Azni

[linkedin.com/in/ameerul-arif-mohd-azni](https://linkedin.com/in/ameerul-arif-mohd-azni)

Senior Full-Stack Developer | Laravel | AWS | DevOps

[hey@amee.my](mailto:hey@amee.my), [amee.my](https://amee.my)

## Professional Summary

Senior Full-Stack Developer and Technical Lead with 10+ years of experience engineering scalable applications and leading cross-border technical teams. Expert in the Laravel ecosystem, modern frontend architectures, and automated CI/CD pipelines. Proven track record of independently managing cloud infrastructure and serverless deployment lifecycles. A CKA-certified continuous learner, currently expanding expertise into Golang to design highly concurrent microservices.

## Education & Certifications

[Certified Kubernetes Administrator \(CKA\) – 2024](#)

[Master of Science in Information Technology](#) – Universiti Teknologi MARA (UiTM)

[Bachelor's Degree, Computer Science \(Hons.\) Netcentric Computing](#) – UiTM

[Diploma of Computer Science](#) – UiTM

## Technical Core Competencies

**Backend:** PHP (Laravel), Laravel Pennant, Laravel Reverb, Octane/FrakenPHP, NodeJS, RESTful APIs, MySQL, Redis, SupervisorD/Systemd.

**Frontend:** Livewire, ReactJS, NextJS, React Native, VueJS, Livewire, AlpineJS, TailwindCSS, jQuery.

**Mobile State Management:** Reducer, Redux Saga

**DevOps & Cloud:** AWS (ALB/ASG/EC2/S3/Vapor/RDS/ElastiCache/DynamoDB/WAF/CodeDeploy), Serverless Framework, CI/CD (GitHub Actions / GitLab Runner / Jenkins), Nginx, Kubernetes (CKA), Cloudflare.

**AI & Developer Tools:** Applied LLMs (Claude, Gemini) for code review, bug detection, refactoring suggestions, and business-context validation before staging merges. Experienced with AI-assisted development using Cursor, Antigravity, MCP integrations, and OpenCode, including running local LLMs such as Gemma for privacy-conscious and offline development workflows.

**Currently Exploring:** Golang

## Work Experience

### VetCheck | Senior Developer & DevOps | Jun 2026 – Oct 2026

- Core developer in the migration of [plugin.vetcheck.it](https://plugin.vetcheck.it) from the legacy platform to the new platform, with primary responsibility for designing and building the AWS infrastructure from the ground up.
- Designed and built the production AWS infrastructure, including Application Load Balancers, EC2 Auto Scaling Groups, AWS WAF, ACM, Aurora MySQL, ElastiCache Redis, S3, and CodeDeploy.
- Designed and deployed a multi-region AWS architecture supporting operations across Australia and the United Kingdom, with WAF protection, autoscaling, and managed AWS services.
- Configured FrankenPHP/Laravel Octane and Laravel Horizon workloads on ARM64 EC2 instances, including application and queue process management.
- Built automated staging and production deployment pipelines with versioned builds and releases.
- Implemented regional release management across AWS Australia and the United Kingdom, using Laravel Pennant for country-specific feature and release control across Australia, the United Kingdom, the United States, New Zealand, Singapore, and Hong Kong.

**ACCEA MALAYSIA SDN. BHD. | System Engineer (Technical Lead) | Feb 2026 – Jun 2026**

- Led system architecture and deployment setup for the company's 2026 overseas technology expansion.
- Served as the senior technical member of the 5-person Malaysian engineering team, providing day-to-day technical direction, mentoring engineers, and coordinating development activities.
- Coordinated technical execution between the Malaysian engineering team and Japan-based management, translating requirements into technical implementation and delivery plans.
- Designed and improved development and deployment workflows to streamline team delivery and operational processes.
- Provided technical guidance, troubleshooting, and engineering support across application development, infrastructure, and deployment.

**株式会社アクセア (ACCEA JAPAN) | System Engineer | Dec 2024 – Jan 2026**

- Independently architected and deployed the centralized membership platform from scratch as the sole developer, establishing automated CI/CD pipelines to ensure reliable production rollouts.
- Developed a robust coupon management system enabling targeted marketing campaigns (welcome/festive promos) that drive user engagement and retention.
- Optimized and enhanced the core business portal, streamlined the end-to-end pipeline for high-volume customer file uploads, print order processing, and delivery logistics.
- Introduced and led a streamlined zero-downtime deployment strategy for Malaysian applications, and collaborated with the Japanese engineering team to transfer the concept and enable its adoption across Japanese applications.

**ACCEA MALAYSIA SDN. BHD. | System Engineer | May 2024 – Nov 2024**

- Independently built and deployed automated meeting room reservation system from scratch as a solo developer, delivering for customers and internal staff.
- Managed the Malaysian tech team, coordinating development, mentoring engineers, improving the team's onboarding processes, and elevating project outcomes.

**FAR Capital | Senior Developer & DevOps Engineer | Sep 2022 – April 2024**

- Mentored and led a diverse cross-border team of 24 developers (15 in Malaysia, 9 in Indonesia), enhancing their technical skills and standardizing project delivery efficiency.
- Managed serverless architecture and production deployments using AWS and Laravel Vapor, optimizing infrastructure costs and ensuring high availability.
- Owned internal tooling adoption including Cal.com and BookStack, standardizing workflows across the engineering team.
- Developed and implemented core code standards for key functionalities like global upload management.

**FP Tech Systems Sdn Bhd | Consultant Development (Freelance) | Aug 2021 – Aug 2022**

- Developed User portal and Super-admin dashboards for a construction company cost tracking application, leading modules for Company, User, Project, Document, and Tender management.
- Spearheaded front-end architecture and UI setup, including a global attachment uploader and dynamic dropdowns, alongside Postmark email integration.

**Digi Telecommunications @ Digi-X | Full-Stack Developer | Nov 2018 – Aug 2022**

- Initiated and led full-stack development of the altHR superapp (backend, APIs, web, and mobile apps), encompassing modules for People, Performance, Helpdesk, and Time-Tracking.
- Engineered a dynamic SFTP driver enabling multi-partner third-party insurer connections and seamless integration with legacy Digi systems.
- Managed automated deployment workflows via GitHub Actions and AWS, ensuring stable delivery of the CS Ticketing platform.

- Built an eKYC MVP with WiseAi integration, successfully reducing fraudulent applications in Digi's PhoneFreedom 365 program.
- Implemented robust mobile features in React Native including push notifications and deep linking.

### **Payments Network Malaysia (PayNet) | Engineer | Jun 2016 – Nov 2018**

- Led the end-to-end development of internal enterprise portals for HR operations (leave, expense claims) and a Change Request Management System, directly improving operational efficiency.
- Built an in-house Vendor Management System for Legal and Office Administration departments.

### **Freelance Laravel Web & System Developer | Jun 2013 – Nov 2016**

- Delivered freelance Laravel web applications tailored to client specifications.
- Provided technical mentorship to university students, guiding them in designing and developing full-stack project prototypes.

## **Key Projects Built for Employers**

### **VetCheck - AI veterinary workflow platform**

**Setup:** Laravel, Livewire, AlpineJS, TailwindCSS, ValKey, MySQL, Systemd, [Pennant](#), [Reverb \(Websocket\)](#), [Octane/FrakenPHP](#), [Gutenberg](#).

Veterinary tools that improve practice efficiency and customer experience - handouts, home care videos, general anesthesia & dental charts, discharge instructions.

### **ACCEA Meeting Rooms (ACCEA MALAYSIA) - [cr.accea.com.my/booking](https://cr.accea.com.my/booking)**

**Setup:** Laravel, Livewire, AlpineJS, TailwindCSS, Redis, MySQL, Supervisor, Stripe.

Complete end to end reservation management with Stripe payment for customers and staff.

### **ACCEA Membership Management (ACCEA MALAYSIA) - [account.accea.com.my](https://account.accea.com.my)**

**Setup:** Laravel, Livewire, AlpineJS, TailwindCSS, Redis, MySQL, Supervisor

Acting as a centralized customer Single Sign-On (SSO) platform. Integrated a robust, cross-platform coupon management system utilized across all ACCEA Malaysia applications.

### **altHR - Superapp for Companies (Digi-X) - [althr.my](https://althr.my)**

**Setup:** Laravel, VueJS, React Native, Redis, AWS EC2/S3/ALB, Supervisor, Redux Saga, Nginx

Engineered almost all modules spanning Helpdesk, Time-Tracking, and Employee Performance.

### **Digi CS Ticketing Platform (Digi-X)**

**Setup:** Laravel, jQuery, Ajax, MySQL, Redis, AWS EC2/S3/ALB, Nginx

Deployed ticketing systems with integrated FreshDesk APIs, managing session security prior to WhatsApp migration.

NOTE: It was decommissioned after a shift to WhatsApp-based support.

### **Digi eKYC MVP (Digi-X) - [digi.com.my/ekyc](https://digi.com.my/ekyc)**

Setup: Laravel, jQuery, Ajax, MySQL, Redis, AWS EC2/S3, Nginx

Architected MVP infrastructure that evolved into CelcomDigi's core eKYC platform.

NOTE: The service was removed after the CelcomDigi merger.

### **MyDigi App "Revamp" (Digi-X) - MyDigi Revamped**

**Setup:** React Native, Redux, Redux Saga, API Integration

Translated UX/UI mockups into performant React Native screens with robust backend syncing.

NOTE: Discontinued project due to the merger plan between Digi and Celcom.

## Personal and Freelance Projects

### AjakMe | Digital Wedding Planner and Invitation Platform (Personal Project)

**Setup:** Laravel, Livewire, AlpineJS, TailwindCSS, MySQL, Redis, Supervisor, Nginx

Actively developing and maintaining features for invitations, guest tracking, and event management for a live SaaS product.

URL: [ajakme.com](https://ajakme.com)

 AjakMe - Event Planner and Digital Invite

### RenAi - Property Management Platform (Freelance)

**Setup:** NextJS.

Worked on an API-driven frontend featuring data synchronization, interactive dashboards, and a fully responsive layout.

 RenAi Property Management

### DengarLah Radio Malaysia App (Personal Project)

**Setup:** React Native, Redux, React Native Track Player.

Executed on-device scraping (CheerioJS) for real-time live streaming of Malaysian radio stations. Published on Google Play Store.

<https://play.google.com/store/apps/details?id=com.amee.dengarlah>

### Musika App - Listen to songs anywhere you are (Personal Project)

**Setup:** React Native, Redux, Redux Saga, CheerioJS, React Native Track Player.

Engineered media scraping from YouTube to overcome API access restrictions, testing advanced content syndication techniques.

<https://play.google.com/store/apps/details?id=com.xmxx.musika>

### Costrack - Cost Tracking App for Construction Companies (FP Tech Systems Sdn Bhd)

**Setup:** Laravel, jQuery, Javascript, Ajax, MySQL, Azure Storage.

Delivered a full-stack cost tracking application tailored for construction resource management.

### Malaysia NRIC Reader (Freelance)

**Setup:** React Native, Custom Java as Native Module/Bridging.

Developed a proof-of-concept integrating custom Java bridging to extract and display Malaysian NRIC card information in-app.

 SmarCardReader

### The Mind Faculty App (Freelance)

**Setup:** React Native, Redux, Firebase.

Developed the app interface and implemented secure Firebase authentication and real-time chat functionality.

 The Mind Faculty
