## About Me

Full-Stack developer specializing in Laravel, with experience in React, React Native, NextJS, and VueJS. I go beyond building features by turning business needs into scalable, and reliable applications. Experienced in backend architecture, API development, and frontend integration, as well as leading tech teams and building automated CI/CD pipelines.

## Technical Core Competencies

Laravel, Livewire, Laravel Vapor, Serverless Framework, PHP, ReactJS, React Native, NextJS, Javascript, jQuery, AlpineJS, Ajax, REST API, JSON, MySQL, AWS EC2, AWS S3, Nginx, TailwindCSS, Redis, Redux, Redux Saga, Jenkins, GitLab Runner, GitHub Actions, Web Scraping, Scrapy, NodeJS

## Work Experience

Dec 2024 - Present | **株式会社アクセア (ACCEA JAPAN) | System Engineer**

- Built and deployed [account.accea.com.my](https://account.accea.com.my) from scratch, delivering ACCEA's centralized membership platform with a robust coupon management system that enables targeted marketing campaigns, including welcome and festive promotions.
- Maintaining and enhancing [accea.com.my/webupload](https://accea.com.my/webupload) with ongoing feature development and reliability improvements. Responsible for change planning, and production deployments.
- Lead developer for the 2026 overseas tech team expansion, currently responsible for initiating system setup in China, with planned expansion to Seoul and Thailand.

May 2024 - Nov 2024 | **ACCEA MALAYSIA SDN. BHD. | System Engineer**

- Built and deployed [cr.accea.com.my](https://cr.accea.com.my) from scratch, delivering an automated meeting room reservation system for customers and internal staff.
- Managed the Malaysian tech team, coordinating development, mentoring engineers, and improving team's onboarding and productivity, and project outcomes.

Sep 2022 - April 2024 | **FAR Capital | Senior Developer cum DevOps**

- Mentored a diverse team of junior developers, comprising 15 members in Malaysia and 9 in Indonesia, enhanced their skills and project delivery efficiency.
- In-charged of any tech setup and integration like Cal.com and BookStack for the company.
- Responsible for serverless architecture planning, deployments and management with AWS and Laravel Vapor, focusing on the cost management, efficiency and scalability.
- Developed and implemented core code standards for key functionalities like upload management

and data synchronization across five projects. Managed and approved pull requests, streamlined CI/CD processes, and standardized application logging.

- Explored Ollama.ai to integrate Artificial intelligence (AI) into the business model and enhance the overall coding experience for in-house developers.

#### Aug 2021 - 2023 | **FP Tech Systems Sdn Bhd | Consultant Development (Freelance)**

- Developed User portal and Super-admin dashboards for a construction company cost tracking application, leading modules for Company, User, Project, Document, and Tender management.
- Spearheaded UI setup and structure, including a global attachment uploader, shared functional dropdowns, and email integration with Postmark app, enhancing user experience and functionality.

#### Nov 2018 - 2022 | **Digi Telecommunications @ Digi-X | Full-Stack Developer**

- Initiated and led development of altHR backend, APIs, web, and mobile apps, including modules for People, Performance, Documents, Helpdesk, Earned Wages Access, and Time-Tracking; implemented advanced mobile features like push notifications and deep linking.
- Developed a dynamic SFTP driver enabling multiple third-party insurer connections and integration with Digi legacy systems.
- Designed and engineered CS Ticketing platform, focusing on customer UI, session OTPs, rich media support; integrated FreshDesk API, automated tagging via GitHub Actions, and managed AWS deployments.
- Built eKYC MVP with WiseAi integration, significantly reducing fraud in Digi's PhoneFreedom 365 program.
- Led MyDigi App MVP development, translating Figma designs into functional UIs and integrating backend APIs.
- Implemented real-time error logging in Laravel apps, integrated with Slack for efficient monitoring.
- Contributed to multiple POC/MVP modules and features across Digi-X, demonstrating technical leadership and rapid prototyping skills.

#### July 2021 - Aug 2021 | **The Mind Faculty | React Native Developer (Freelance)**

- Focused on developing the app's interface, meticulously building screens with user-centric designs. Successfully integrated Firebase for robust authentication and chat functionalities, enhancing app security and user engagement.

#### June 2016 – Nov 2018 | **Payments Network Malaysia (PayNet) | Engineer**

- Developed internal portals for HR processes (leave, expense claims) and a Change Request Management System, improving operational efficiency.
- Built an in-house Vendor Management System for Legal and Office Administration departments.
- Contributed to additional internal tools, including an Employee Recognition app and company lucky draw generator.

## June 2013 – Nov 2016 | **Freelance Laravel Web & System Developer**

- Mentored final-year university students in designing and developing project prototypes using Laravel, providing hands-on training in full-stack development.

### **Featured Projects**

#### Ajak Me - Digital Wedding Planner and Invitation Platform (Personal Project)

- **Setup:** Laravel, Livewire, AlpineJS, TailwindCSS, MySQL.
-  AjakMe - Event Planner and Digital Invite , <https://ajakme.com>
- Building features for invitations, guest tracking, and event management to address an untapped market opportunity.

#### RenAi - Property Management Platform (Freelance)

- **Setup:** NextJS.
-  RenAi Property Management
- Worked on the frontend featuring API-driven data synchronization, interactive dashboards, and a fully responsive frontend for improved user experience.

#### DengarLah Radio Malaysia App (Personal Project)

- **Setup:** React Native, Redux, Redux Saga, CheerioJS, React Native Track Player.
- <https://play.google.com/store/apps/details?id=com.amee.dengarlah>
- Implemented live streaming of Malaysian radio stations, using on device scraping for real-time playback as a self-directed technical challenge.

#### Musika App - Listen to songs anywhere you are (Personal Project)

- **Setup:** React Native, Redux, Redux Saga, CheerioJS, React Native Track Player.
- <https://play.google.com/store/apps/details?id=com.xmxx.musika>
- Scrape live media content from YouTube and other sources without official APIs, focusing on overcoming access restrictions and testing technical solutions.

#### Costrack - Cost Tracking App for Construction Companies

- **Setup:** Laravel, jQuery, Javascript, Ajax, MySQL, Azure Storage
- Completed project; ran for several months before client reprioritization.

#### Malaysia NRIC Reader (Freelance)

- **Setup:** React Native, Custom Java as Native Module/ Bridging
-  SmarCardReader
- A proof of concept to read Malaysian NRIC and display extracted information in-app.

### The Mind Faculty App (Freelance)

- **Setup:** React Native, Redux, Firebase
-  The Mind Faculty
- Discontinued project due to client reprioritization.

### Twitter Job Vacancies Aggregator (Personal Project)

- **Setup:** NextJS, NodeJS, CheerioJS, GitHub Action, SQLite
- <https://wfhlah.vercel.app/>
- Developed a proof of concept for automated data scraping and aggregation using Twitter data; discontinued after X platform changes.

## Projects for Previous Employers

### altHR - Superapp for companies

- **Setup:** Laravel, VueJS, React Native, jQuery, Ajax, MySQL, Redis, AWS EC2/S3/ALB
- <https://althr.my>

### Digi CS Ticketing Platform

- **Setup:** Laravel, jQuery, Ajax, MySQL, Redis, AWS EC2/S3/ALB
- <https://support.digi.com.my> (It was decommissioned after a shift to WhatsApp-based support)

### Digi eKYC MVP

- **Setup:** Laravel, jQuery, Javascript, Ajax, MySQL, Redis, AWS EC2/S3
- <http://digi.com.my/ekyc> (CelcomDigi enhanced the MVP version to what they have now)

### MyDigi App "Revamp"

-  MyDigi Revamped
- **Setup:** React Native, Redux, Redux Saga, API Integration
- Discontinued project due to the merger plan between Digi and Celcom.

## Education

### Universiti Teknologi MARA (UiTM)

- Master of Science in Information Technology, Information Technology.
- Bachelor's Degree, Computer Science (Hons.) Netcentric Computing.
- Diploma of Computer Science, Computer Science.

## Certificates

[2024 Certified Kubernetes Administrator](#)
